DETAILED ACTION

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. In claim 12, --positioned perpendicular to the central axis and dividing the curved surface in equal halves-- should be inserted after "a net" to provide structural cooperation between the listed claimed elements.

Claim Rejections - 35 USC § 112

3. Claims 11-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 11, line 8, "the long edges" lacks a proper antecedent basis and should be changed to --the straight edges--.

Claims 12-30 are rejected because they depend from a rejected claim 11.

Art Unit: 3711

Claim Rejections - 35 USC § 103

4. Claims 11, 13, 14, 21 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent Number 3,343,793 (Waser).

Regarding claims 11, 13 and 14, Figure 2 of Waser shows a track structure 211 formed from a cylindrical crown and having curved edges perpendicular to the central axis and straight edges parallel to the central axis. Although the Waser track is not intended for use in racquet games, applicant is reminded that prior art meeting the structural limitations of the claims and that is inherently capable of performing the intended use fully meets the claims under 35 USC 102.

Regarding claim 21, Figure 8 of Waser shows the track structure supported by legs 85.

Regarding claim 24, the Waser track structure is considered to be inherently capable of being supported on the ground.

5. Claims 15-20, 22, 23 and 25-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Waser as applied above.

Regarding claims 15-20, 22, 23 and 25-30, it would have been obvious to one of ordinary skill in the art to make the Waser track greater than two meters or wider than one meter or thicker than two centimeters or to place the track at a height greater than 60 centimeters to accommodate a particularly sized

Art Unit: 3711

ball or vehicle or to vary the inclination of the track since such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art.

Allowable Subject Matter

6. Claim 12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will

Art Unit: 3711

expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8. This action is a **final rejection** and is intended to close the prosecution of this application. Applicant's reply under 37 CFR 1.113 to this action is limited either to an appeal to the Board of Patent Appeals and Interferences or to an amendment complying with the requirements set forth below.

If applicant should desire to appeal any rejection made by the examiner, a Notice of Appeal must be filed within the period for reply identifying the rejected claim or claims appealed. The Notice of Appeal must be accompanied by the required appeal fee of \$ 165.00.

If applicant should desire to file an amendment, entry of a proposed amendment after final rejection cannot be made as a matter of right unless it merely cancels claims or complies with a formal requirement made earlier. Amendments touching the merits of the application which otherwise might not be proper may be admitted upon a showing a good and sufficient reasons why they are necessary and why they were not presented earlier.

Art Unit: 3711

A reply under 37 CFR 1.113 to a final rejection must include the appeal from, or cancellation of, each rejected claim. The filing of an amendment after final rejection, whether or not it is entered, does not stop the running of the statutory period for reply to the final rejection unless the examiner holds the claims to be in condition for allowance. Accordingly, if a Notice of Appeal has not been filed properly within the period for reply, or any extension of this period obtained under either 37 CFR 1.136(a) or (b), the application will become abandoned.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Raleigh Chiu whose telephone number is (571) 272-4408. The examiner can normally be reached on Monday-Thursday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Greg Vidovich, can be reached on (571) 272-4415.

The fax number for the organization where this application or proceeding is assigned is (703) 872-9306.
